

ZOE-DV-Lanc is a zoom grip for Mini-DV Camcorders. Now you can use Mini DV Camcorders with professional tripods. The zoom speed is controlled by the amount of pressure applied to the zoom button; bothersome pre-adjustment of the zoom speed setting becomes unnecessary.

- Stepless zoom speed without pre-adjustment
- Focus function
- Recorder start-stop switch
- Camera on-off switch
- Zoom and focus directions reversible

Pressing the "Focus" button changes the function of the zoom switch to focus.

The new assembly of the ZOE-DV-Lanc makes the zoom grip suitable for use in high humidity environments.

The ZOE-DV-Lanc can be mounted on all tripod arms up to 24mm diameter. This means it can be used with all common DV and ENG models from leading manufacturers (for example Sachtler, Vinten, Cartoni, Manfrotto, Miller).

The redesigned quick-mount clamp permits fast mounting on the tripod arm with just a few turns of the knurled knob.

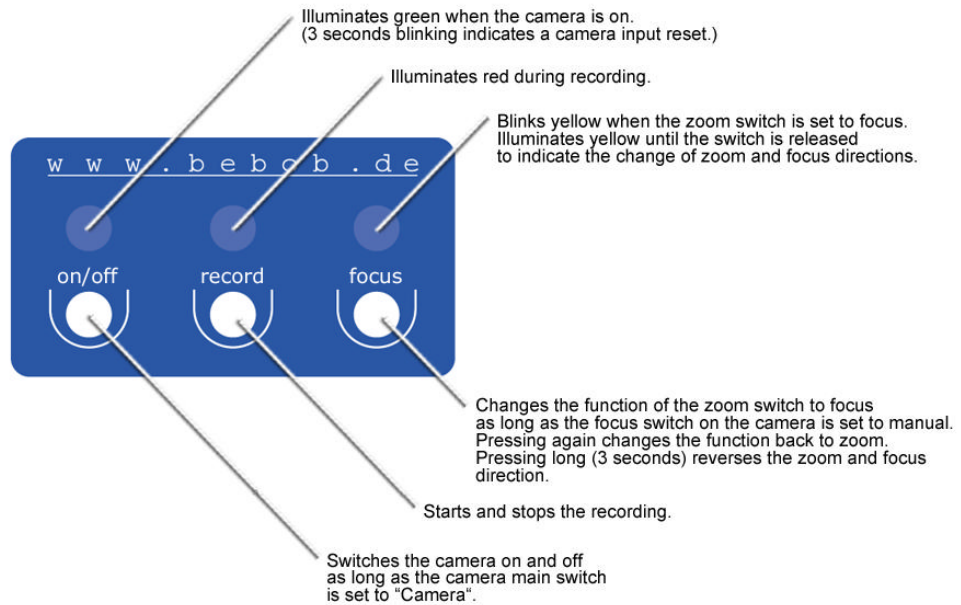

The ZOE-DV-Lanc can be used with:

- All Sony Mini DV models with Lanc connection, for example VX-1000, VX-2000, PD-100, PD-150
- All Canon Mini DV models with Lanc connection, for example XL-1, XM-1
- All other cameras with Lanc connection
